

Biology, Chemistry and Physics 188L, 189L, 190L, 191
Senior Thesis Syllabus – Spring 2010
Joint Science Department
W.M. Keck Science Center
The Claremont Colleges

Coordinator:

Dr. D. McFarlane, Keck-B43, x72564, dmcfarlane@jsd.claremont.edu

Registration:

1 semester thesis finishing in May (“1s”): registered for 190L or 191 in Spring.

2 semester thesis finishing in May (“2s”): registered for 188L or 189L in Fall AND 190L in Spring.

2 semester thesis finishing next December 2010 (“2f”): now registered for 188L.

Grading:

Senior Research in (Science) 188L

Participation (seminar summaries)	10%
Oral presentation	20%
Semester end progress report + effort (1 st reader)	50%
Semester end progress report + effort (2 nd reader)	20%

Senior Thesis in (Science) 190L, 191

Participation (seminar summaries)	10%
Effort (1 st reader)	25%
Written thesis (1 st reader)	25%
Written thesis (2 nd reader)	20%
Poster	20%

Participation:

You are required to attend at least **six (6)** seminars in science, each semester of thesis program registration, of the many that are offered throughout the Claremont Colleges. There are a variety of seminar programs in biology, chemistry and physics. For six of these, write a one page summary of the talk. Give these to your first reader by April 23. She/he will read these for content and forward them to the Coordinator for tabulation.

Progress/Effort:

For 188L (2f) students, there will be a brief oral presentation during the week of April 5-9. Contact your first reader for logistics.

For 190L (2s) and 191 (1s) students, there is a poster session on Friday, April 23. Your presentation will be evaluated by a panel of faculty.

For 188L (2f) students, turn in a substantial progress report to your first and second readers on April 23. This should consist of at least seven pages of literature survey and proposal as well as three pages of materials, methods and a description of progress to date. It should also include a bibliography. This is a minimum, as your first reader may want additional pages or materials.

Meetings with Thesis Readers:

Your readers are responsible for most of your grade, so it is your responsibility to meet regularly with them and keep them informed about your progress.

Thesis Program Communications:

Regularly check the bulletin board outside the Administration office (Keck 110). Information on seminars and other useful information will be posted here and around Keck. Also check with your first reader research advisor as to upcoming meetings.

Satisfactory Work and an Admonition:

Thesis is usually one-fourth of your academic load and you should expect to devote 10-15 hours per week to the effort. Successful field or laboratory work often requires significant amount of continuous effort – schedule your work week accordingly.

Students doing two semester theses will be graded on their first semester work. A thesis project may be terminated and/or converted to a one semester library thesis if, in the judgment of the thesis readers, inadequate effort has been made and successful completion is unlikely.

Animals:

Any and ALL theses involving experimental work with animals (including fieldwork) require formal approval from the JSD Animal Care and Use Committee, which in turn is bound by complex legal regulations. Consult the AUC website (<http://jsd.claremont.edu/bio/animalcare>) for details and forms. The deadline for turning in these forms is 12 noon, Wednesday, January 27 in the JSD Administration office. **There are no exceptions** – miss the deadline and you cannot use animals in your research.

Experimentation involving Humans:

Experimentation involving humans requires the approval of the appropriate “Human Subjects Research Committee” - see your first reader as soon as possible.

Penalties for Late Theses:

- i. One grade point reduction (i.e., A to A-) for theses turned in up to 24 hours late.
- ii. Two grade point reductions (i.e., A to B+) for theses turned in from 24 to 72 hours late.
- iii. Three grade points (i.e., from A to B) for theses turned in from 3 days to one week (5 days) late.
- iv. Additional full letter grade (three grade points) for each subsequent week (5 days) of lateness (or part thereof).
